David graduated from Florida State University in 1996 with two Bachelor of Arts degrees, one in Marketing and Management and one in Small Business Management and Entrepreneurship and afterward began his real estate career working in a business brokerage company. David created business plans and marketing campaigns for the purpose of selling businesses in south Florida. He successfully listed and sold small businesses prior to moving back to Tallahassee in 1997 where he was employed by a not-for-profit business incubator. David consulted business owners on startup and growth strategies while he worked toward his Master's in Business Administration at Florida State University. He completed his MBA focusing on International Business in 1999 and subsequently accepted a position with Office Depot where he ultimately became the Manager of Marketing Campaigns for North America.

After relocating to Jacksonville in 2002, David's drive for real estate was revived when he joined Bakkar Group, a commercial real estate developer and rose to the position of Vice President of Operations during his nine year tenure. His expertise in commercial real estate was focused on the success of retail shopping centers. He worked on ground-up development of shopping centers to include land acquisitions, zoning, entitlements, construction, leasing, and property management. Additionally, David participated in the purchase and sale of existing centers. He was a vital component in the daily operations of the company where his primary focus was leasing.

David joined Strategic Sites in early 2012 where he leveraged his commercial real estate knowledge and consulting experience to represent tenants, landlords, and investors. Working with Landlords and Tenants alike provides him with a well-rounded approach that helps close deals. David currently has focused on retail asset investments to include shopping centers, single tenant NNN, and land where his relationships have cultivated acquisitions and dispositions for both sellers and buyers whether the assets were marketed or off-market.
